

Powerful Single Controller Storage

The **TrueNAS R-Series** offers high-density unified storage solutions that combine the robust features of OpenZFS with cost-effective, single-controller hardware.

Available in all-flash and hybrid models, the R-Series provide outstanding density and price-performance for scalable, reliable storage without sacrificing quality. Designed to maximize storage value, R-Series appliances cater to environments that demand high performance and scalability.

TrueNAS R-Series Features

High-Density Unified Storage

Combines the robust capabilities of OpenZFS with cost-effective, single-controller hardware, available in both all-flash and hybrid models.

Advanced Data Protection

Features self-healing OpenZFS file system with copy-on-write, automatic bit-rot detection, built-in RAID protection, unlimited snapshots, and resilient replication to safeguard data integrity.

Scalable Architecture

Supports scale-up and scale-out S3 configurations, enabling seamless expansion from a single NAS/SAN/object to clustered deployments as storage needs grow.

Flexible Integration

Compatible with major virtualization platforms, backup software, and cloud storage services, with a fully featured API for streamlined integration & management across diverse IT environments.

Africaplus Direct Distribution Ltd (APDD) is an official partner and distributor of TrueNAS Open Enterprise Storage across Africa.
